YOTI App

Childline and the Internet Watch Foundation have come together to provide a service where children can request the removal of sexual images of themselves which have been shared online. As part of that process the child would be asked to provide a link to where the image is stored online, rather than send the image itself.

The child is also required to verify their identity and age and this is done through the YOTI app. YOTI will not store images of the child's ID following the verification process.

Below are a couple of online resources which contain details regarding this service:

https://www.nspcc.org.uk/preventing-abuse/keeping-children-safe/sexting - There is a section which covers what you can do if you've lost control of a sexual image and refers to the YOTI app.

https://contentreporting.childline.org.uk – This is the portal where you can report images and videos for take down and again refers to using the app to verify age.

NetAware

Is an excellent downloadable App that will update workers/parents and children on the risks to many Apps and will show how to set security and shows the level of and types of risks to children.
